Cash is Vital in a Digital World

Cash usage is still thriving, despite the growth of digital capabilities.

of American consumers hold cash

of payments under \$10 are in cash

of in-person payments are made with cash

of teens that get money from adults are given cash

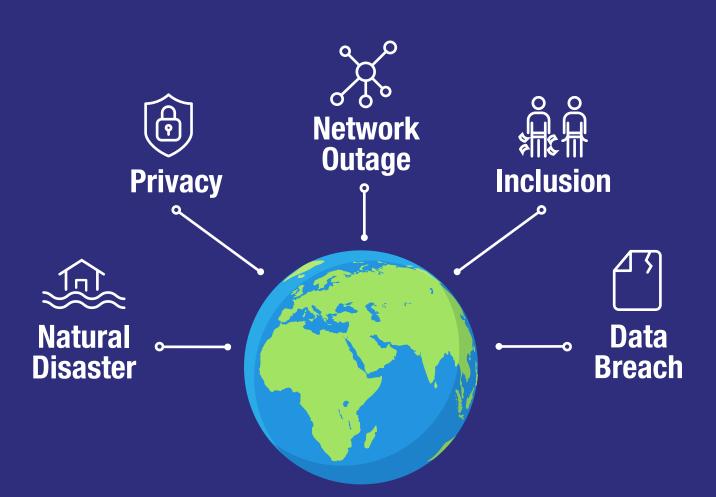

of unbanked customers' transactions are made with cash

access regardless of income or status

Why is cash important?

Available when digital connections are lost due to network outages

Provides more privacy than other forms of payment

Accessible to all income and status levels

Works when non-cash payments are unreliable during natural disasters

Limits the risk of data breaches as it is the most secure form of payment
